## THE MINING EXCHANGE

The Afternoon Call Seemingly Meets With Favor,

## ANNANDALE AND EMERALD Four Aces Horn Silver Hierschel Mercur Mammoth Geyser-Marion Ontario

ENCOURAGING SHOWING IN THE TINTIC PROPERTIES.

The Bottom of the Annandale Shaft Breaking Into Quartz That Is Spotted With Copper in Its Native State-The Emerald Workings in Black Lime That Is Heavily Mineralized-The Indications in Both Prospects Are Excellent-The Northern Light Mill-Successfully Started Up on Saturday of Last Week-The Mine and Mill in Splendid Condition and the Outlook Flattering-Mining in Arizona-Strike of Rich Gold Ore Near the Gold Clift-Capitalists Invading That Region.

The morning call in the pit of the mining exchange was not marked by any degree of activity, and the sale of 500 shares of Northern Light was the only thing that saved the board Encouraging Showing in These Tinfrom a whitewash.

But little change was noticeable in the quotations on the leading stocks. Ajax held its own in fairly good shape at 67 cents bid and 70 asked. Bullion-Beck was inactive at \$6.80 bid and \$7.90 asked. Buyer and selier were in rather close proximity to each other when Daiy was called and for a while it looked as if a transfer in this stock would be recorded. At the close Daly was wanted at \$1.00 can be a sking. Galena and Geyser failed to draw out any earnest inquiry, and yet they were strong at near the quotations of the previous call. Mercur, while it maintained its own in the offerings was inactive in the bidding, while Mammoth was a favorite and closed strong at the selling figure of Saturday last. Sunshine was unchanged but quiet. Uith was fignily held but in the bidding the stock experienced a decline.

But little attention was paid to the unlisted stocks, although it was the dealings in these that saved the pit from the disgrace of a whitewash. Swansea, although holders stood out for an advance, was slow in the kidding. The bears made an attack on South Swansea and at the close this Ajax held its own in fairly good shape are interested in the development of

for an advance, was slow in the Edding. The bears made an attack on South Swansea and at the close this favorite was quoted at 11.00 bid and streaked with seams of iron. It is the life Pittsburg was stronger than it has been for the bast few weeks and a wanced to 3% cents in the bidding, while the stock was firm at 5 cents asked. Dexter was slumpy and was offered at \$1.85 with no buyers in the pit. Valeo was called for the first time for the past month, and while this once popular ascurity was offered as low as

he transactions of the call were as

SALE OF STOCK.

Total sales, 500 shares. Value of sales, \$390,25.

AFTERNOON CALL. The afternoon call proved to be quite a success and if there is as much interest taken in it in the future as there was yesterday, it is believed that the system of having two calls daily will add greatly to the volume of business in the transfer of mining stocks.

in the transfer of mining stocks.

In the listed stocks Bullion-Beck showed gains over the morning quotation. Starting at \$6.50 in the bldding this security advanced steadily and went as high as \$7.50 for a board let. went as high as \$7.50 for a board lot, but this bid was subsequently withdrawn and the stock closed at \$7.40 bid and \$7.55 asked, 25 shares selling at \$7.50. Daly was stronger in the holdings than during the morning hour, but Daly West slumped in the bidding and was more firmly held in the offerings. Galema and Geyser were practically unchanged. Mercur was a triffe stronger in the bidding but in the offerings it was stationary. Manmoth was in better demand and recorded sales at a slight advance. Utah sustained a de-

tory. Mr. Wells is an expert and has stronger in the bidding but in the offerings it was stationary. Manmoth was in better demand and recorded sales at a slight advance. Itah sustained a decitine in the offerings but was stationary in the bidding.

There was but little change in the unilsted stocks, although they exhibited more activity than during the first call. Little Pittsburg was strong at 3% calls. Little Pittsburg was strong at 3% can be stated in the offerings. Northern Light was a ready seller and was strong at the quotations given below. Swansea lost in the bidding as well as in the offerings. South Swansea, however, made decided gains although the stock was inactive. Buckbye was a ready seller and chronicled for capital and his several visits there would indicate that himself and associates are about to back his judgment and take hold of some of the promising properties in that section. Mr. Sheedy is also a prominent mining man of means and is laterested in several successful mining ventures. He is president of the Globe Smelting company of Denver. Mr. Sheedy is also an official in the Denver National bank.

Owners of the Last Chance mine, Cochise coming fall. An agent for a smelting company offered to take there was our little change in de-trailisted stocks, although they exhib-ited more activity than during the first call. Little Pittsburg was strong at 3% cents, but was beared in the offerings. Northern Light was a ready seller and low. Swansea lost in the bidding as well as in the offerings. South Swansea, however, made decided gains although the stock was inactive. Buckeye was a ready seller and chronicled gains. Dexter was stationary at the carrier offering and recorded a bid s. Dexter was stationary at the ting offering, and recorded a bid

SALE OF STOCK. 25 Bullion-Beck at \$7.50, 100 Men with at \$1.55, 100 Men in Light at 78 cents. 1500 Buckers at 18 cents. 1,000 Richmond & Anaconda at 2%

Potal sales, 2,725 shares, Value of sales, \$456.75. Total sales for the day, 2,225 shares. Value of sales for the day, \$1.047.

In these pioneer properties on the west dip as one the awarded that they will be equally as successful. In these pioneer properties on the west dip as one of the such the past few months, and it will not be long before two or three mills will be in operation upon them. The Edna May is looking especially will will be in operation upon them. The Edna May is looking especially will. This property is embraced in the will not operation upon them. The Edna May is looking especially will. This property is embraced in the will not operation upon them. The Edna May is looking especially will. This property is e

on the La Cigale group of claims on the west dip, in Camp Floyd district, which are owned by the company, viz:

"The contract has been awarded to Jones & Jacobs of Salt Lake City for the erection of the mill building and setting of all machinery for the Boston and Mercur Gold Mining company; also for an assay office and house for the management. The machinery contracts have been awarded to the Rawson & Morrison Manufacturing company of Cambridge, Mass., the Corliss Engine company of Providence, R. I., Frazer & Chalmers and Gates Iron works, both of Chicago, Ill.

"The mill will have a capacity of 200 tons a day, with a power of crushing capacity of 400 tons a day. It is intended by the management, after the 200-ton mill has been running for a few months and more ground has been opened up in the mine, and he states that a few days ago he made a survey of the or extraction and milling. Samples of ore were also taken from the mine and demonstrated that there were 12,500 tons blocked out ready for extraction and milling. Samples of ore were also taken from the mine, and demonstrated that there were 12,500 tons blocked out ready for extraction and milling. Samples of ore were also taken from the mine, and demonstrated that there were 12,500 tons blocked out ready for extraction and milling. Samples of ore were also taken from the mine, and demonstrated that there were 12,500 tons blocked out ready for extraction and milling. Samples of ore were also taken from the ton to the bottom and from every incline and cross-cut, the average value of which was \$1.40 in gold to the ton.

Experimental tests in a small way have been made on this ore with the cyanide process, and it has been demonstrated that with this system a saving of 90 per cent of the gold yalues can be saved, and it is believed that on a working basis this percentage of saving can be maintained.

The Dalsy shaft is now down to the process, and it has been demonstrated that with this system a saving of 90 per cent of the gold yalues can be saved, and it has b

capacity of 400 tons a day. It is in-tended by the management, after the 200-ton mill has been running for a few months and more ground has been opened up in the mine, to increase the capacity of the mill to 400 or 500 tons this year.

This mill will be a new departure for a eventde process mill and will be

This mill will be a new departure for a cyanide process mill and will be the only one of the kind ever built of this special design. It was designed by Henry S. MacKay, architect, one of the directors of the company and one of the principal holders of the stock, and the mill will be built under his personal direction. The principal difference in this mill from others is the automatic handling of the ore by machinery, to save labor.

The mill is located over the mouth of the Boston shaft, or incline, which is sunk on the vein from the outcrop. In other words, the shaft comes up in the mill. The ore is brought up from the mill. The ore is brought up from the self-dumping skip, and is carried to a distance of about 35 feet above the mouth of the shaft. The ore is then passed from the self-dumping skip onto grizzleys; part of the ore then passing through a none-quarter-inch ring, then through a second set of 35-inch Cornish rolls, where the ore is broken down to pass through a one-quarter-inch ring, then through a second set of 35-inch Cornish rolls, where the ore is broken down to one-quarter-inch rolls, where the ore is broken down to one-quarter-inch rolls, where the ore is broken down to one-quarter-inch rolls, where the ore is broken down to one-quarter-inch rolls, where the ore is broken down to one-quarter-inch rolls, where the ore is broken down to one-quarter-inch rolls.

through a second revolving screen, and through a second set of 36-inch Cornish rolls, where the ore is broken down to one-quarter-inch mesh. From the last set of Cornish rolls a belt elevator carries the ore to a large ore bin at the top of the main tankhouse, which is some 40 feet high. This ore bin extends the full length of the tankhouse, forming two compartments lengthwise of the building, the bottom of each compartment being V-shaped.

"The ore as deposited from the elevator at the top of the ore bin, is conveyed along by traveling belt conveyers, and is distributed the length of the ore bins, which extend the full length of the tank house, which is 105 feet long. Directly under these ore bins are the leaching tanks, which are made of steel 16 feet long, 6 feet wide and 4 feet deep, and are arranged in two rows of 12 sets, or 24 tanks in all. These tanks differ from other leaching tanks used in the cyanide process, as they are made with solid bottoms, water tight, except the opening to draw off the solution. They have the ordinary false bottom, and filter inside, but they rest on a revolving pivot, which consists of a 4-inch steel shaft, passing lengthwise through the tanks and keyed to them. On the end of this is the owner of the new property. It is located on Tomlinson hill near the Gold Cliff. The surface indications were most favorable, but it remained for Mr. Hanley to do a little work to demonstrate the value of the property. He left Tombstone last week prepared to do considerable work, but after sinking about two feet he encountered the ledge, which, should it remain strong and uniform, may mean much wealth for the fortunate milkman. Some of the ore brought to Tombstone is of high grade character, while on many pieces free gold can be seen. Further work will at once be prosecuted and developments awaited.

Two Denver miners and capitalists, A. M. Wells and D. A. Sheedy, are at Tombstone this week, and it is reported that they are after some good properties in that section of the territory. Mr. Wells is an expert and has done some work in Arizona, principally consists of a 4-inch steel shaft, passing lengthwise through the tanks and keyed to them. On the end of this shaft is a gear and woim wheel and crank. By means of this worm gear wheel one man can turn the tank upside down on its pivot, and all the ore is thus emptied out into tailing bins, which run directly under all off the tanks, the full length of the tank house, similar to those for the ore at the top of the building. The tailings thus deposited in the lower part of the building automatically run down another story, through steel spouts, into traveling conveyors which deposit them out into the vailey, beyond the mill.

tensive plant, and it finds that by earlying on, at the same rate, development now in hand, there will be completed, enough ore blocked out to run a mill of this capacity for three years.

"The company will continue the developments, and the Beston Inclinability it is certainly a good big find.

"The company will continue the developments, and the Beston Inclinability is composed to the company will continue the developments, and the Beston Inclinability is composed to the composition of the company will continue the developments, and the Beston Inclinability is composed to the composition of the composition of the composition of the scape of the present stockholders. The stock however, will be two pockets in each level, one on each side of the shaft, each holding about 150 cons of orc.

"It is intended by the management of the company to make it a thorough complete business mining proposition; it is not to be a stock jobbing operation, and the mine is to be worked entirely for the dividends to be earned for the present stockholders. The stock however, will be listed on the Boston stock exchange at the proper time."

WEST DIP DEVELOPMENTS.

can tell you the dimensions of the ledge in which this rich ore has been found in this in this rich ore has been found in the list is certainly a good big find.

"Hesides there is constantly coming into Yuma hewer of ore from it was entored sales of ore from it was station, and is surrounded by desport of Yuma, in Arizona, near tension of the company to make it a thorough complete business mining proposition; it is not to be a stock jobbing operation, and the mine is to be worked entirely for the dividends to be earned for the present stockholders. The stock however, will be listed on the Boston of the first from the week soil for ying poultancy named the mine is to be worked entirely from example the proper time."

## WEST DIP DEVELOPMENTS.

in the Edna May.

The Herald is informed that the rush to Mercur is in full blast again, and

to Mercur is in full blast again, and that the excitement of a year ago over this great gold camp is likely to be reenacted, and with greater force and volume than ever before.

As it is, the trains to Mercur are again being crowded, and as soon as the snow disappears on the north side of the mountains and in the deep canyons, every hill side will be dotted with tents, whims and shaft houses, and it is confidently believed that before the season is over a goodly number of valuable discoveries will be made throughout the district.

Special attention, however, will be board.

# THE NORTHERN LIGHT MILL.

broken down in the property. Enough in fact, to keep the mill in operation for a long time to come.

## THE YUMA GOLD FINDS.

Great Excitement Over These Arizona Discoveries.

Colonel George F. Payne of California was in Pomona a few days ago and while there he told the correspondent of the

was in Pomona a few days ago and while there he told the correspondent of the San Francisco Chronicle about the great mining furore he found existing at Yuma Ariz. Mr. Payne says Yuma has auddenly become the craziest mining town he has ever been in. "I have seen nothing like the present excitement over the suddenly found riches and prospects of further finds than in Yuma last week, says Mr. Payne. "Virginis. Nev., in the early "O's compares something with it, and Cripple Creek and Tombstone were never in it for unadulterated excitement. I never would have believed it if I had not been there.

"There are more big capitalists interested in Yuma now than in any place in America. I saw there yesterday such men as D. H. Hubbard, who sold the Harqua Hala mines for 2000006 in 1835."

T. M. Morgan, who represents a syndicate of Chicago and St. Louis bankers. Mark Phelps, who has half an interest in the Amaconda mines; R. E. Creede, from Creede, Colo., besides several rich New Yorkers who have come there through statements of the values of Colorado, I don't believe that any town the size of little Yuma can show such an aggregation of capitalists, and I heard last night that several rich Englishmen whom Senaor Dorsey had interested in these mining possibilities, are on their way to Yum?.

"The town is wild with excitement because of two finds of marvelously rich

dent of the Globe Smelting company of Denver. Mr. Sheedy is also an official in the Denyer National bank.

Owners of the Last Chance mine, Cochise country, contemplate the erection of a smelter the coming fall. An agent for a smelting rompany officed to take all the ore he could get for 8 cents a pound for the copper it contained. Messrs. Woods and Woods of New York City, mining men of wide experience contemplate a visit to the mining district with a view to investing.

### Silver and Lead Quotations. The silver and lead quotations yester

day were as follows: Bar silver 62% cents; copper, exchange 111 50; brokers, \$11.40; lead, exchange \$3.55933.57%; brokers', \$3.30.

Herbert S. Cohen has made application for membership in the stock exchange, and the same has been duly posted on the board.

board.

The subject of a mill for the Golden Gate mine, at Mercur, is again being agitated in certain circles, and it is stated that wagers have been made that work in its construction will begin before the first of July.

first of July.

The adjourned meeting of the annual meeting of the Golden Bar Mining commany will be held in this city on the lith of May next at room 491 McCornick block for the election of a new bourd of directors and for the transaction of such other business as may come before the meeting.

will examine into the merits of the Blue Mountain country.

Some very successful tests have been made of late with the Ellis concentrator, a new invention in this direction that is owned by a Salt Lake company. On the first of the week a test was made on second class Sliver King and Anchor sulphide ores, and it was found that the machine handled this class of mineral to perfection, and especially the Anchor product, from which the zinc was separated and conveyed into the tallings pit, while the silver and lead values came out in the shape of nice, clean concentrates.

The Dexter company received another consignment of gold buillon from the Dexter mine yesterday, valued at \$1,500. A letter was also received by the company stating that the property was looking well and that the ore bodies were improving with development. So far this month the Dexter mill has been turning out about \$1,500 daily in gold buillon, and it is expected that as soon as the cyanide plant is in operation again that the output will be materially increased.

Hon. Thomas G. Merrill is feeling in

as the cyanide plant is in operation again that the output will be materially increased.

Hon. Thomas G. Merrill is feeling in excellent spirits over the showing in the properties in Ophir. Camp Floyd and Tintic districts which are being developed under his direction. In the foothills north of Ophir canyon work is being pushed in the prospecting of the California group, in which encouraging values are already being uncovered, while on the Vanderbilt, on the west dip, the grade of the ore is constantly increasing. In Tintic district Mr. Merrill is doing effective work in the opening of the Justice and Gracie claims adjoining the Triumph. He will soon let a contract for 300 feet of work on the Gracie, and he is confident that with depth he will encounter large bodies—gh grade ore.

When Manager E. D. bode: of the Northern Light was out to the mine a few days ago, one of the men p. bed up a piece of ore from a pile of waste that was about as large as a man's hand. A Bull was found that it carried values of 2.735 ounces in silver to the ton, and that the piece was nearly pure horn silver. It was such a pretty specimen that one of the men at the mill cut it up into seven-pieces with a saw, and these were given to the visitors at the mine as souvenirs of the trip. This is high grade ore, and it is so soft that it can be cut with a knife almost like lead. At the Chloride Point mine a similar piece of ore was found a few days ago that assayed 2.500 ounces in silver to the ton and well in gold.

Mining World, Butta, Mont.: Salt Lake is evidently no place for the mining life.

ounces in silver to the ton and well in gold.

Mining World, Butta, Mont.: Salt Lake is evidently no place for the mining fraternity, at least the sleek well-fed ones from Montana. The police and detectives of that city have spotted several of them lately. Charles S. Herzig, the well-known young mining enginer of this city met with a most amusing experience while passing through Salt Lake this week. Mr. Herzig is on his way to New York on a business trip. He was spotted by a detective and marched through the streets to the police, headquarters where he was held a few hours on suspicion of being a long-looked-for embezzier. The error was discovered after a delay of nearly a day, and Mr. Herzig was allowed to go on his way rejoicing.

The base of Ayer's Hair Vigor is a refined and delicate fluid, which does not soil or become rancid by exposure to the air, and which is a perfect a work trute in youth and health, as modern ing. chemistry can produce.

trade and moderately active market in drug dept.

wheat during the early hours, but the

Interest increased considerably as the session advanced.

The early strength was due to the advance in Liverpool of 1d, Berlin also coming higher. There was a decrease on ocean passage of 880,000 bushels, and the weekly world's shipments showed some reduction at 3,753,000 bushels and the weekly world's shipments showed some reduction at 3,753,000 bushels against 4,543,000 bushels last week and 4,450,000 bushels last week and 4,450,000 bushels and was active on the buying side here, and had considerable to do with the rally. The weather map showed rain in Nebraska and the Dakotas, and was looked upon as favorable.

The government crop report was apparently not a factor and suggested a crop of about 205,000,000 bushels. Northwestern receipts were liberal. The visible showed a decrease of 906,000 bushels of against a reduction of 1,018,000 bushels last year.

Total quantity now is 37,706,000 bushels one year back and 70,500,000 two years ago.
